ZUNGO APP STUDIO

Quick License Activation Guide

> Thank you for downloading your offline retail software. Follow these 3 simple steps to activate your setup and secure your counter layout.

STEP 1: Launch the Installer & Bypass Windows SmartScreen

Because Zungo software runs 100% offline with zero cloud background costs, Windows Defender may show a blue "SmartScreen" protection box.

1. Click the **"More info"** link inside the blue popup window.
2. Click the **"Run anyway"** button that appears at the bottom.
3. Follow the quick prompts to complete your desktop installation.

STEP 2: Locate & Extract Your Unique Hardware ID

1. Double-click the new Zungo icon on your desktop to launch the app.
2. Look at the startup window layer to find the Hardware ID panel.
3. Choose one of these two quick ways to export your system details:

> **OPTION A: Click the "Generate" Button**
>
> This automatically builds a file named **"Registration_Info_[your registration name].txt"** containing all your system details and opens it on your screen.

> **OPTION B: Click the "Send Mail" Button**
>
> This immediately opens your default desktop email client with all your activation details already typed into the message body.

STEP 3: Send Your Details for Instant Activation Keys

To get your trial activation key or lifelong commercial license, send your information directly to Andrias Hammer using one of these routes:

EMAIL:	Just click "Send" if you used the Send Mail button! Otherwise, mail your text file to **sale@zungo.co.ke**
